

all his head could be seen. The people crowded closer and watched him revolve slowly on the turn. Twice around he swung, and then, at an estimated altitude of 600 feet, he turned his eyes into the east and slowly, methodically, he climbed higher until the incessant buzz of his powerful motor had died away. Then the aeroplane was no longer a machine. It was simply a new species of bird. Steadily and onward Moisant flew, going ever higher, until he was almost lost to view.

Far down and above the city a group of buzzards hung lazily in the air, and the gazing thousands sometimes lost him, only to pick him out again and again to lose him. The flight was directed first into the north.

Over the White-Walled Prison.
On the outer rim of the city Moisant swung back to the south, appearing over Broad Street, and then turned the nose of his little machine towards the white-walled prison. He was at an altitude of 1,200 feet, but he shot down in a wide circle to within 800 feet of the uplifted eye of the prison. He came down so close that they could hear the roar of his motor. As they looked in wonderment he made a half circle, and then swung eastward down over the city. From between the walls of the silent prison convicts watched him come and disappear.

It was the first time in the history of the world that a free show in the air had ever been afforded to prisoners, and they were grateful for the generosity of the man who swung aloft above them. He looked down and saw that he was above the prison for the white walls were his signal. The men in stripes he could not see, nor could he hear their gladsome shouts. Only the rooftops came within his vision, and there was no noise in his ears save the whirr of his motor. All else was a sea of utter space and of utter silence save for that sound which he created. The whole city watched him. From every housetop people looked at the strange thing of the sky. And others, too, scattered all over the city, looked for and found him.

Circled Back Again.
As he left the air road above the prison Moisant headed still further into the northeast, swinging in his backward turn again in a long half circle and headed back to the penitentiary, crossing Capitol Square to the south and racing by The Times-Dispatch building close enough to be caught by a camera's powerful lens. The figures 21 under his plane flew so easily read. Again his plane flew so easily read. Again his plane flew so easily read.

As he left the air road above the prison Moisant headed still further into the northeast, swinging in his backward turn again in a long half circle and headed back to the penitentiary, crossing Capitol Square to the south and racing by The Times-Dispatch building close enough to be caught by a camera's powerful lens. The figures 21 under his plane flew so easily read. Again his plane flew so easily read. Again his plane flew so easily read.

From the northeast, with the sunlight splashing on his planes, he appeared again in view of the thousands in the grounds. People roared in exultation as they saw him safely returning over the long straight buildings northeast of the central field he came into view and seemed as if to pay and hover.

Another roar of applause rang out. Then he turned his nose downward at an angle of forty-five degrees, and shot down through the empty spaces to the homing field. It was a perilous looking affair, and the people watched breathlessly. As he came nearer to the ground lever, he settled as a bird feels for a tree perch, and then dropped lightly down, the monoplane hopping and skipping until it came finally to a rest.

One Mighty Shout.
Then the thousands broke out in a mighty shout. In high treble the women yelled, their voices ringing high above the heavy tones of the men. They wanted to rush into the field and welcome the aviator back to earth, but the county and city police held them in check.

Then he turned his nose downward at an angle of forty-five degrees, and shot down through the empty spaces to the homing field. It was a perilous looking affair, and the people watched breathlessly. As he came nearer to the ground lever, he settled as a bird feels for a tree perch, and then dropped lightly down, the monoplane hopping and skipping until it came finally to a rest.

A NOTRE DAME LADY'S APPEAL
To all knowing sufferers of rheumatism, whether muscular or of the joints, sciatica, lumbago, backache, pains in the kidneys or neuralgia pains, to her for a home treatment which has repeatedly cured all of these tortures. She feels it her duty to send it to all sufferers. FREE. To cure yourself at home, send your name and address to Mrs. M. SUMMERS, Box R, Notre Dame, Ind.

"Berry's for Clothes."

Next, here's a Berry winter coat for the most "exclusive circles" for the particular man of good taste. The cloth is a fine soft melton, lining of Italian serge and between these the true inwardness of the coat, the insides, are as good as the outside—it's a thoroughbred!

\$35. But we don't limit you to one style, here are "fifty-seven-varieties"—\$15 to \$40.

Coats for boys and girls and raincoats of the dependable sort for women.

For girls—Graceful girl-style suits made in a bold, manly way. That's why they're different and distinctive, and being made in a class to themselves.

Prices, \$3.50 to \$18.

For boys—Big bundles of comfort or medium length dressy effects—according to the exposure of your son.

\$3.50 to \$14.

A special suit proposition. A full suit and extra pair of pants to match, \$5.00.

New Berry garments—knickerbocker style. Write for samples if you live out of the city.

For women—The Berry raincoat is a strictly waterproof, guaranteed garment, that's dependable and will wear for years like the men's—\$20 to \$28.

Another roar of applause rang out. Then he turned his nose downward at an angle of forty-five degrees, and shot down through the empty spaces to the homing field. doing. But I guess Simon has gone off on a little trip of his own. He generally does what he pleases. I tell them to go up, and they fly to suit themselves."

Looking for Simon.
And then Barrier and Garros circled anxiously out in the north. They, too, were looking for their companion. They had thought that he had been chasing them as they had chased each other. Presently they picked him out far to the east, and then, with a great, wide swoop, they turned their machines into the face of the sun, and started in pursuit of their elusive countryman. High up their climb until they appeared like huge snakes, a fitting description country people will know and recognize.

They became smaller and smaller, and were mere specks in the clear blue of space. Soon they were gone so far that they were undistinguishable. People lost them and then picked them out for each other. There were so many buzzards flying over the city that it finally became next to impossible to tell which was which.

Crossed James Oliver.
Simon had gone completely from view. Thinking that he had been chased, he headed his monoplane toward the east, and was lost. Barrier and Garros flew on until they found him about midway above the city, coming back to look for them. Simon had flown down the city, with the river on his right, and then crossed the river and he hung back to the north, flew over the City Hall and the Capitol, and swung again east until he had passed the air fields above Fulton. As he swung around for the homeward stretch, he saw Garros and Barrier approaching, and waved them a signal. The two who were flying straight towards him, swung their machines wide to the north to give him air room, and then swung back into line.

Together, one after the other, they swept back over Broad Street, like airships in battle array moving upon the enemy. The hands of the clock appeared again in view of those in the Fair Grounds. They flew with the utmost ease and grace. People rushed by the cordon of police, and ran for the central field. The police gathered them and put them back beyond the fence, and then watched them for another outbreak. Enthusiasm had gone beyond bounds.

Simon, the Dare-Devil.
Led by the dare-devil Simon, the trio of Frenchmen swept in from the east in a perfect line. Simon, at an angle of forty degrees, shot down until he got directly in front of the grandstand, where he dipped and then over the grandstand he flew with a roar. The other two were circling behind him, flying wide and then coming in for a closer view as Simon gave them room. They turned and shot around the empty space at will, fearful of nothing and careless of everything.

After they had made swoops, sharp turns and dives to satisfy even the most reckless selves, they gradually settled down. Garros returning to terra firma at 4:15, followed by Barrier two minutes later. But Simon evidently changed his mind when he saw the course cleared away into the north, and for another twelve minutes. Finally he came down at 4:18.

Moisant Up Again.
Moisant went up again at 4:30 o'clock. He hung around in midair, cutting short, sharp turns, driving his man-made machine at will wherever he listed. He circled about the tower to the north, beyond the Exhibition Building, and then shot straight back to the grandstand, turning sharply in front of it. The people rose on tiptoes and yelled. Women screamed lustily. From far beyond the outside fence people leaned in from their places in the trees. And Moisant circled and kept on circling, rising up and down the field, around it, shooting over the grandstand, and doing everything that looked impossible.

As he came once by the grandstand he took one hand from the wheel, and waved. The crowds cried out, and even above the roar of that mighty machine he must have heard, for he came lower and waved again. As he soared away he breathed into the sunlight, and the great bird looked like a thing of beauty come from some other world.

Flying for Fun.
Moisant was flying just for fun, as he always flies, merely and only for the sheer pleasure of vaulting into the blue. As he came back from the southwest, where he had seemed to sail directly for the setting sun, into those clydean fields which the Greeks believed to exist as heaven beyond the sun, he pointed down, with motor still running at full speed, flung his machine to the ground. It hopped along like a sparrow trying to alight on a flimsy perch, and then stopped. Again went up that might shout. When they couldn't yell any more the people just laughed at it all. They were realizing what a wonderful thing man has learned how to do.

Simon went up again as Moisant came down, remaining in the air eight one-half minutes. He went up just to do stunts for the grandstand, and he did them. Simon is all life, living, and as though he would keep on flying. He shot to and fro over the grandstand, gliding down until it seemed that he must fall, and came so low that

he must fall, and came so low that

he must fall, and came so low that

he must fall, and came so low that

he must fall, and came so low that

he must fall, and came so low that

he must fall, and came so low that

he must fall, and came so low that

Healthy Kidneys Are Essential to Health and Happiness

Many people have kidney trouble and do not know it. If you have dull, aching pains in the back or have to get up often in the night, you should lose no time in finding out if your kidneys are diseased. Mr. Edwin Denike, of 1121 Elm Street, Pensacola, Fla., suffered for years from kidney trouble and wants to let every one know how he was cured.

In a recent letter Mr. Denike said: "I was sick a long time with kidney trouble. The doctor treated me, and finally gave me up as incurable. One day my wife brought home a bottle of Warner's Safe Cure, and I commenced using it. I cannot speak too highly of your medicine. It has done so much for me. I am sending this because I think it my duty as a man to tell my story to others so they can be helped also."

Then the kidneys are diseased the uric acid is not carried off, and this leads to Rheumatism, Backache, Gout and Bright's Disease. Warner's Safe Cure carries off the uric acid and soon the kidneys are healed.

Warner's Safe Cure is made from the fresh juices of plants and medicinal roots, gathered at the proper season in various quarters of the globe. It is prepared by men skilled in pharmacy and chemistry; is pleasant to the taste and agreeable to the most sensitive stomach. It is put up in 50c and \$1.00 sizes and sold by druggists everywhere.

Constipation and Biliousness.
Warner's Safe Pills, purely vegetable, absolutely free from injurious substances are a perfect laxative. They do not gripe or leave any bad after effects. 25 cents a box.

Trial Bottle and Box of Pills. To convince every sufferer from diseases of the kidneys that WARNER'S SAFE CURE will cure them, a trial bottle and a sample of Warner's Safe Pills will be sent FREE OF CHARGE, post-paid, to one who will write WARNER'S SAFE CURE CO., Rochester, N. Y., and mention having seen this liberal offer in the Richmond Times-Dispatch. The genuineness of this offer is fully guaranteed by the publishers.

his ever present smile could be seen as those standing below. Called to the grandstand like a shot, came directly back over the Exhibition Building, and then headed straight for the grandstand again. In the middle of the field he dipped, and then lifted up until he was high enough to clear the great building where the wondering people sat.

Cuts Wide Circle.
Over the southeastern end of the field he cut a wide circle, and then came down until he was within fifty feet of the ground. He dipped when they thought he was to alight, and soared away. Sometimes he flew about at altitudes where his motor could not be heard, but more frequently on this trip he slid around the air lanes in close proximity to the heads of the people. It seemed that he would never get so close.

He finally, with a great whirl and a terrific swoop, he hit the ground at fifty miles an hour. He had done enough for one man, but he walked over to the other Frenchmen as if it had been nothing. He is nonchalant itself, seeming to care for nothing and nobody.

At 4:18 Garros was ready with his famous trick and dangerous demonstration. He glanced around above him and watched the hang of the flags and the drifting of the smoke from the stacks in the distance. Then he climbed into the little perch, which hangs but six inches from the ground and is situated directly underneath the motor and the wings. He sat himself down, and then he and his assistants carefully strapped him in, and then one of them gave a twist to the propeller.

The Little Demoiselle.
One man held it until the signal, and then, at the signal, it skipped a scalding foot along the ground before it would lift into the bosom of the air. The motor was not working well, and Garros remained within 200 feet of the ground, sometimes hanging almost within reaching distance. He winged his way around the southern side of the field, and swept wide over the grandstand, lower than the past few times. He swung back into the lanes over the field, and flew back to a point half way between the north side. As he came down the frail Demoiselle bumped along the ground as if it were refusing to stay, but it finally stopped, and Garros crawled out. A motor car brought him back.

"The motor wasn't working well," he said, "and I didn't go as high as I should like to have done." The Demoiselle is the smallest and most dangerous aeroplane built. It appears so frail that few aviators have entrusted their lives to it. Its two most successful operators are Santos-Dumont, the inventor and builder, and Garros.

The Last Flight.
The last flight of the evening was made after sunset, while the shades of evening were gathered over the people who had remained to see it all. C. K. Hamilton had spent nearly the whole day in working on his engine, and at last had got it so that it would work fairly well. At 5:21 he started down, and the Demoiselle arose, but in finding that the motor was still working badly, he remained in the air two minutes. He circled the track twice, and flew off into the northwest for a short distance.

As he came back to earth it was announced that the flights were finished, and that the most famous aviation meet in the world next to that of Belmont Park, was at an end. The vast throng was already doing, and several of the other machines had been broken to pieces. Many still lingered to watch and ask questions of the aviators and mechanics were busy looking after their machines, and had no time to talk. The crowd gave way gracefully, and within a few minutes the grounds were deserted except by those who had to stay and work.

Leave for Tennessee.
From here the Aviators, Incorporated, go to Chattanooga, Tenn. Before leaving the grounds, John B. Moisant, who ranks as one of the world's greatest aviators, said that he would attempt to make a flight from New York to Chicago when present engagements were completed. He intends making a built entirely of metal, which is now on its way from his factory in France to New Orleans. He intends trying to make only one stop between the two cities, and says he is assured that he can make it with only two stops. Then will come a trip for a cross-country flight.

Except for the attendance, the meet was absolutely successful. The Moisants make no promises that they could not fulfill. "We do not say what we will do," they declared yesterday, "but what we have done." Richmond was the first city picked out for the air

show, but the people failed to give the attendance which had been expected. The day of the interest in aviation aroused by the exhibitions of Ralph Johnstone, who lost his life in Denver. The gate receipts were not sufficient to cover expenses. But in other cities, where grounds are being offered free and where prizes are being offered, the Moisants hope and expect to be more successful.

Leave on Special Train.
Alfred J. Moisant and all of his international aviators except John B. Moisant left the city last night in a special train with their aeroplanes over the Norfolk and Western Railway, for Chattanooga, Tenn., where they open on Monday.

John B. Moisant went to New York, but will join the party Monday. While the Richmond engagement was not a success financially, Mr. Moisant said it didn't worry him, as in the early stages of organization he simply wanted to show the public what he had to offer. Moisant and Richmond got mighty good publicity the world over in the Associated Press dispatches sent out last night.

CONVICTS GAZE UP AT MOISANT

(Continued From First Page.)

chinery was heard. Hardly had the inmates time to turn when the monoplane, even lower than before, flashed across the space above. There was a sharp turn, and Moisant, with a wave of recognition to show that he appreciated his reception, raised his rudder and sailed away at a mile-an-minute clip for the Fair Grounds.

There are at the penitentiary men who have recently come in and have seen about all there is to see except an aeroplane. But there are others to whom street cars look like freaks and automobiles like miracles. For years and years their horizon has been the grim walls of the prison, and they have remained in one place while the world has gone ahead. All they know or what is going on out the outside is what they hear of the latest arrivals, and like children they cannot take it in. The fact that a man travels through the air is a fairy tale that most of them have heard, and when they saw it yesterday they were literally stricken dumb with the wonder of it. Those who spend their time on the farm see things once in a while, but the great mass that passes from cell to work bench and back from day to day knows little and cares less of what the world is doing and something like Moisant's flight yesterday comes along and again awakens the dormant minds.

Forty Years in Prison.
One of those who saw the flight from the yard yesterday was a gray-haired, tottering old man, who was committed September 10, 1870. He had been taken out once or twice of the guards, but he pitifully asked to be returned to his cell. The world had got too far ahead of him; he could not comprehend it all. He and others who had spent years behind the walls gazed at the flying machine, and aft the manner of trained convicts had little to say. It was beyond them, and they were taught not to ask questions. Not only the convicts enjoyed the treat that Moisant gave away on the side. Few of the guards had been able to get out to the grounds, and this was

their first opportunity to see an aeroplane in action. One of them was so enthusiastic that he offered to furnish material and a free pass to the man who would construct a machine like Moisant's and fly away with it. The convicts smiled sadly and went back to their work.

"I think it is safe to say that this is the first time in history that the inmates of a prison like the State Penitentiary have had the chance to witness anything like Moisant's flight to-day," said Superintendent Wood last night. "The idea of having two convicts see a flight was first brought to my attention by a message from the Times-Dispatch this morning. I at once recognized what a great pleasure it would be for them, and readily gave my consent for them to stop work for the time. There was no hitch in the arrangement, and before the appointed time they were lined up in the courtyard. There is no doubt in my mind that it had a fine effect on the men. In fact, I talked with some of them afterwards, and they seemed deeply to appreciate the fact that the people on the outside remembered them. The guards, too, who are closely confined, enjoyed the spectacle greatly. The men behaved themselves as well as an I have ever seen, and those who had the opportunity thanked me heartily."

VISITOR IN DURHAM.
Distinguished Frenchman Guest of the Duke—Other News Notes.

Durham, N. C., November 26.—Viscount Jules Gaspar-Edessee, a distinguished Frenchman from Paris, in the city, visiting Mr. and Mrs. P. N. Duke, having arrived here yesterday. He is a warm friend of the family, having entertained Mr. and Mrs. Duke at his Paris home when they were abroad. He has also been their guest in New York on a former occasion. He will remain here until Monday, when, in company with Mr. and Mrs. Duke, he will return to New York City to spend a week.

Charles Holloway, a colored man from Chapel Hill, was arrested here last night by Officers Pendergast and Chalmers. He is accused of having tried to kill a woman. He made an effort to shoot her with a revolver.

Schwarzschild Bros. Attractive Christmas Gifts in Sterling Silver and Gold Wares

Elegant, appropriate and refined describe the gifts which we are showing for this happy holiday season.

We have taken infinite pains to satisfy the most critical in every detail, and the newness and beauty of designs, properly priced, which has always characterized products of the Schwarzschild store, is fully maintained.

We are pleased to show everything here, and suggest that you call so that you can inspect at your leisure.

Engraving and special designing can now be done with perfect satisfaction.

Some Gift Hints—

Brooches, Bracelets, Necklaces, La Vallieres, Pendants, Card Purse, Silver Bags, Umbrellas, Opera Glasses, Chains, Hat Pins, Seal Rings, Cuff Buttons, Scarf Pins, Toilet Sets, Manicure Sets, Cordial Sets, Whiskey Sets, Shaving Sets, Cigarette Cases, Match Safes, Waist Pins.

There is nothing more elegant than a Diamond at Christmas. We invite attention to our Diamond Department. We carry only stones of highest quality, elegantly mounted.

Diamond Brooches..... \$10.00 to \$800.00
Diamond Bracelets..... 12.50 to 600.00
Diamond Rings..... 8.50 to 1000.00

Our holiday catalogue is ready for mailing. Write for it. Careful attention given to mail orders.

Schwarzschild Bros. JEWELERS Cor. Broad and Second Sts.

last Sunday while on a rampage, but was restrained.

The tobacco market, rather listless for several days on account of Thanksgiving activity, received a new impetus yesterday when the three warehouses handled the week to the extent of about 125,000 pounds. It was one of the biggest breaks of the season.

The Southern Power Company has forces of hands at work between the point as Greensboro arranging the line for poles for the wire which is to bring its power to Durham. A good deal of energy is being manifested in the prosecution of this work, which now consists of cutting out the wire. It is now probable that a large station will be established here, and that Durham will have new and important power next spring.

Whiskey and Drugs or Happiness?
Which? It's up to you. Oh, don't say you are doomed to a life-long curse of drink or drugs, for without restraint or confinement, you can be happily and permanently cured by accepting our treatment. No deposit or fee expected, or accepted until a satisfactory cure is complete. Sanitarium equipped with all modern conveniences, latest electro-therapeutic apparatus, baths, etc. Our large booklet, "The Truth About Liquor and Drug Habits" mailed free upon request. Patients also treated at home.
